PROFESSIONAL SUMMARY

UI/UX Design student (B.Des., Symbiosis Institute of Design, graduating May 2027), seeking a 6-month UI/UX design internship from December 2026. Designed 40 client-approved dashboard screens and 10 heat maps (data visualisation) at Tech Mahindra, and designed a healthcare app that scored an average SUS of 86.5 with 5 test users.

WORK EXPERIENCE

UI/UX Design Intern, Tech Mahindra, Pune, India May 2026 – Jul 2026

- **Dashboard UI:** Designed 20 dashboard screens in each of light and dark mode (**40 in total**) plus **10 heat maps** for a client-facing sustainability product, from mood board and design system through low-, mid- and high-fidelity to a prototype.
- **Design System & Accessibility:** Built reusable components, variants and shared colour and text styles in Figma, and checked contrast in both themes.
- **Feedback & handoff:** Worked daily with developers and PMs throughout the internship, refining the screens through repeated feedback rounds. **The client approved the final UI**, which is now being published on their website.

UI/UX Design Intern, Labmentix (remote) Sep 2025 – Mar 2026

- Worked on user research, wireframing and prototyping for digital interfaces, and collaborated with developers to turn design requirements into interfaces that follow usability standards.

SELECTED PROJECTS

Breathe Safe: Chronic Asthma Management App Dec 2025 – Feb 2026

- **User Research:** Ran 6 stakeholder interviews and a 12-respondent survey (**11 of 12** would find activity guidance very or extremely useful); ran a competitive audit of 7 apps, finding none that gives asthma-specific feedback during activity.
- **Research Synthesis & Interaction Design:** Turned personas, an empathy map and a journey map into a problem statement, then designed a breathing check-in, activity and inhaler logging, and a one-tap caregiver alert across 9 task flows.
- **Usability Testing:** Tested the Figma prototype with 5 participants using think-aloud, eye-tracking and SUS (**average 86.5**), found 12 issues and planned fixes for the home and caregiver screens.

Resham Riwayat: Banarasi Silk E-commerce Prototype Jun 2025 – Oct 2025

- **Field Research:** Interviewed a Varanasi workshop's owner, manager and an artisan, documented the 21-step weaving process, compared 4 competing brands and mapped stakeholders.
- **IA & UI Design:** Defined task flows and information architecture, then designed a desktop-first storefront: shop, product page, 5-step checkout and photographer booking.

Rethinking the Thela: Street Vendor Cart Redesign (team of 2) Mar 2026

- Interviewed 6 street vendors in Pune with a teammate and used affinity mapping to find physical strain as the main issue with 100–300 kg carts; built the 3D model of a low-cost (est. **₹5,000–6,000**), locally repairable cart in SketchUp and D5 Render.

SKILLS & TOOLS

Design & Prototyping: Figma, Illustrator, Photoshop

UI Craft & Accessibility: Dashboards and data visualisation, design systems, components and variants, auto layout, responsive frames, contrast checks

UX Research & Methods: User interviews, surveys, contextual inquiry, affinity mapping, personas, journey mapping, task flows, wireframing, information architecture, usability testing (SUS, think-aloud, eye-tracking), competitive audits, root cause analysis (5 Whys)

Technical & Code: HTML, CSS; exploring AI prototyping with Lovable

LEADERSHIP & VOLUNTEERING

International Buddy, Chiba University Global Buddy Program Aug 2023

- Buddy to students from Chiba University, Japan, during their E-Study India Program; awarded a Certificate of Appreciation by Symbiosis Centre for International Education.

EDUCATION & CERTIFICATIONS

B.Des. in UI/UX Design, Symbiosis Institute of Design, Pune | SGPA 8.23 / 10 Aug 2023 – May 2027 (expected)

Google UX Design Professional Certificate (Coursera)

Published author (Destiny by Design); cover artist, Golden Sun Stories to Celebrate
