SUMMARY

User Experience Design student (Symbiosis Institute of Design, 2027) with two UI/UX internships (Tech Mahindra and Labmentix) and hands-on experience in user research, information architecture, and usability testing across healthcare, sustainability, and cultural-heritage projects. Has tested designs with 30+ users and stakeholders, lifting a SUS score from 62 to 82 and task completion by 30%. Seeking UI/UX design and user research opportunities.

EDUCATION

Bachelor's in User Experience Design Aug 2023 – May 2027
Symbiosis Institute of Design, Pune, India | Current SGPA: 8.23 / 10

EXPERIENCE

UI/UX Design Intern — Tech Mahindra May 2026 – Jul 2026
Pune, India · Hybrid

- Designed light and dark mode versions of every screen for a client-facing product (IntelleTwin project), maintaining visual hierarchy and accessibility across both themes.
- Collaborated daily with developers and product managers to turn early wireframes into production-ready, high-fidelity screens over a 2-month engagement.

UI/UX Design Intern — Labmentix Pvt. Ltd. Sep 2025 – Mar 2026
Remote

- Worked on UI and UX design tasks including user research, wireframing, and prototyping, designing user-friendly digital interfaces.
- Collaborated with development teams to translate design requirements into effective UI/UX solutions that follow usability standards.

Fundraising Intern — Muskurahat Foundation Aug 2025 – Sep 2025
Pune, India

- Reached out to 120+ prospective donors across three campaign cycles, increasing engagement by 15%.

Craft Documentation Intern Jan 2023 – May 2023
Varanasi, India

- Interviewed 18 stakeholders and documented 15+ traditional craft processes across 3 artisan clusters to build a digital archive.

PROJECTS

Banaras Silk Digital Experience Jul 2025 – Aug 2025
Varanasi, India

- Conducted field research with 12+ artisans before wireframing; after defining the information architecture, tested it with 15 users and improved task completion by 30%.

Chronic Asthma Support App 2025
Pune, India

- Interviewed 10+ patients to map where their care experience broke down, identified 6 friction points, and iterated the design until usability rose from 62 to 82 on the SUS scale.

Vegetable Cart Vendor Redesign 2025
Pune, India

- Researched mobility, safety, weather, and usability challenges with 6 street vendors, then designed a frugal thela redesign with 7 interventions to reduce physical strain, improve manoeuvrability, and enable local repairability.

SKILLS

UX & Research: User Research, Wireframing, Prototyping, Usability Testing, Information Architecture, Journey Mapping, Design Thinking, Interaction Design
Design Tools: Figma, Adobe XD, Illustrator, Photoshop, InDesign
Programming: HTML, CSS, Java, Python
